

FLAT MOTION External BLDC motors are ideal for applications where space is limited and include compact rotor designs that can operate continuously at very high speeds. They have an open body design for better passive heat dissipation and use Hall sensor technology with multi-pole cables for easy control. They are lightweight, have low power consumption, and a long service life.

COMPACT AND POWERFUL

FLAT MOTION External BLDC Motors are uniquely designed for applications that require a lot of power in a limited space. Their flat profile results in the same output with better torque characteristics compared to internal rotor motors and they include up to 16 poles for quiet operation at low speeds. Customized windings or shaft modifications are also possible.

EASY CONTROL

FLAT MOTION External BLDC motors are available in 32mm, 45mm, and 60mm sizes. Their compact configurations include multiple pole magnets and result in smooth operation and low noise. Easy control is made with cables using Hall sensors as external rotor motors and they offer plenty of space for internal connections. The digital pulse signal control and high torsional strength hollow shaft design result in optimal performance and operational control.

LONG LIFE EXPECTANCY

Each motor's simple structure has no slip ring or brush and electronic commutation allows for accurate speed control, a reduced thermal loss, easy maintenance, and a longer service life.

FEATURES & SPECIFICATIONS

- 32mm, 45mm, 60mm sizes
- 9V, 12V, 24V, 48V
- Hollow Shaft Designs
- Low Power Consumption
- Compact and lightweight
- High Heat Dissipation
- Class B insulation
- Operating Temp -20°C to +50°C
- Operating Life up to 25,000 hours
- Water and Dust Proof
- RoHS Compliant

APPLICATIONS

Robotics
Industrial Automation
Medical Devices
Laboratory Equipment
Optics
Pumps
Bar Coding Machines

FLAT MOTION External BLDC motors are compact and lightweight motor solutions for applications with limited space that require high performance and accurate control at different speeds.

EC45-30/EC45-50/EC45-70

45mm External Rotor BLDC Motor FLAT MOTION SERIES

Winding Type	: Star
Hall Effect Angle	: 120 Degree Electrical Angle
Resistance Accuracy	: ±10% @20°C
Inductance Accuracy	: ±20% @1kHz
Ambient Temperature	: -20°C~+50°C
Insulation Resistance	: 100MΩ Min, 500VDC
Dielectric Strength	: 500VAC for one minute
Shaft Radial Play	: 0.02 Max (450 g-load)
Shaft Axial Play	: 0.15 Max (450 g-load)
Operating Temperature	: -20°C~+50°C
Insulation Class	: Class B

MODEL NO		EC45-30		EC45-50		EC45-70	
Number of Poles				16			
Number of Phases				3			
Rated Voltage	VDC			24			
Rated Speed	RPM	5000		5250		4860	
No-Load Speed	RPM	6500		6710		6110	
No-Load Current	A	< 0.5		< 0.5		< 0.5	
Rated Power	W	30		50		70	
Rated Torque	mN.m	50		84		130	
Rated Current	A	1.6		2.6		3.6	
Peak Torque	mN.m	150		252		390	
Peak Current	A	4.8		7.8		10.8
